Mendel Tulip, Gatli Curci Doz. \$1.60, 100 \$12.00

New Mendel Tulips

We arge you to plant some of these new hybrids this season—you can enjoy the big, handsome, rounded Darwin-like flowers so much earlier (just after the Single Earlies). If you appreciate the long, graceful stems of Darwins you will like these too, for they are longer than others to be found at this time. Blooming so early they will be out of the way for your customary annuals. They're satisfactory for forcing also.

Galli Curci. 20 in. Bright scarlet, narrow white edge. Inside the extra large blooms are salmon scarlet with yellow base. An outstanding variety. Doz. \$1.60, 100 \$12.00.

Mrs. E. H. Krelage. 24 in. Pure satiny rose pink; creamy white base within.

Doz. 70c., 100 \$5.00.

Scarlet Admiral. 22 in. Very showy, large, globular blooms of a luminous vermilion red; black base, within.

Doz. 70c., 100 \$5.00.

RED EMPEROR TULIP

The Largest in Cultivation!

Dazzling vermilion scarlet with a large black center bordered with yellow—the most brilliant of all, blooming soon after the Single Earlies. What a sight those giant flowers are—opening to as much as 9½ inches in diameter on 18-inch stems! Customers in previous years have been amazed and delighted with their splendor. This year the supply is more plentiful so we can offer them at a lower price. Each 35c., 3 for 80c., doz. \$3.00.

Glorious New Triumph Tulips

Keep abreast of the times and plant some of these—a new type of Single Tulips blooming between the Early Singles and the Cottage, filling the gap admirably, and giving the large, beautifully formed, Darwinlike flowers on tall stems quite a few days before the regular Darwins appear. Figures in parenthesis () indicate height in inches. Suitable for February forcing.

Aviateur (21). A brilliant carmine-red with a narrow silvery white edge.

Outstanding as a bedding variety.

Elizabeth Evers (22). A huge, finely formed flower of a deep carmine rose.

Excellent for either bedding or late forcing.

Doz. 85c., 100 \$6.50.

Kansas (21). A very beautiful pure white of a sturdy, erect habit that we can especially recommend.

Nova (22). Large, egg-shaped blooms of a salmon-apricot beautifully tinted burnt orange; creamy white base. Within is a soft salmon-rose shade with a base of yellow. Excellent for early forcing.

Oz. 85c., 100 \$6.50.

Ursa Minor (23). Pure golden yellow. The large, cup-shaped flowers are carried on strong stems, eclipsing all other yellow Triumph Tulips.

With every bulb order we plan to pack a leastet with information that will help to make bulb culture successful for you. Make sure that you receive your copy. Kindly note that in some years the skins of Tulips are so hard and firmly attached that the roots cannot push through. This is especially true of some Double Tulips. If you receive a stock with uncracked skins, it will pay you to break off a portion of the husks before planting.

prefer Prepared Bulb Fiber while others will use pots and soil with equally satisfactory results. We suggest having sufficient bulls to permit succession plantings throughout the season from November to March. They will keep in perfect condition the first planting is not made until November, and then kept in a cool room. The later the season the quicker the bulbs throw their flowers, only about two weeks' time being required during March. Not hardy outside.

Perry's Narcissi or Daffodils

"Daffodil" is a common name, best used in referring to Trumpet varieties of Narcissi, that large and varied family of bulbous plants, so easily grown for their early Spring flowers. These are perfectly hardy without protection. Plant these bulbs as early in the Fall as possible so roots may be made before the ground freezes.

All the Narcissi listed on this page, except the Poet's Grand Soleil d'Or, Chinese Sacred Lily and Paperwhites, are suitable for forcing and are very extensively used for this purpose. Soil is preferred as a medium in which to grow them and bonemeal the best

Jonquils and Campernelles

Charming, small-flowering, single Narcissi highly prized for their graceful and fragrant golden yellow blooms. Fine for forcing or outside planting. Especially nice in rock gardens.

Campernelle giganteus. Superior in every way to older varieties. Bears the largest sized blooms in clusters of two, three and sometimes four to a spike. Forces readily and early. Delightfully fragrant.

Each 10c., doz. 90c., 100 \$6.50.

Golden Sceptre. The deep Jonquil yellow blooms are 3 or more inches in diameter, possess a delightful fragrance and keep exceptionally well both in the garden or when cut. Each 15c., doz. \$1.15, 100 \$8.50.

Jonquil, Single. The old-fashioned single, sweetscented kind. Very hardy and excellent for naturalizing and cutting. Each 10c., doz. 80c., 100 \$6.00.

The Poet's Narcissus

An old-fashioned type that retains its popularity for general planting and naturalizing. Their chaste beauty is as much appreciated as their spicy fragrange. Early planting of these varieties is desirable.

Horace. A superb white variety for the garden or for forcing. Has a conspicuous red eye. Each 10c., doz. 90c., 100 \$6.50.

Poeticus. The popular, snow white, late Pheasant-eye Narcissus. Orange red eye. Very fragrant. Each 10c., doz. 75c., 100 \$5.50.

Poeticus Ornatus. An improved form of Poeticus, larger and earlier. Cup yellow, tinged rosy scarlet. Each 10c., doz. 90c., 100 \$6.50.

Save a Year by Renewing Your Lawn this Fall

Many a good lawn has just about been ruined by the heat and drought of this past Summer. It is probable that a considerable number will have to be entirely re-sown, else with the return of rains, a plentiful crop of weeds will spring up and produce an unsightly appearance.

Fall is the ideal time for re-seeding as more favorable conditions for success exist than at any other season, The soil is still warm and the sced will germinate quickly and continue to thrive until the ground freezes solid. There is little danger from trost to September and October sown lawns. True, weeds may also pop up but most of them

Japanese Beetles are becoming a serious menace in this vicinity. Their grubs feed on grass roots during September and October. As insurance against this damage all newly built lawns should have 8 to 10 lbs of Arsenate of Lead thoroughly worked into the top-soil of each 1000 sq. ft. of area. This should be done before seeding and can be
